Terrible Internet Speed

2019/09/02

Hi, so for a good few months my internet connection was perfect, could easily support gaming and video conferencing without a problem but recently I've been getting KB/s download speed and can barely handle YouTube in 720p. I've tried flushing my dns, releasing and renewing IP configuration and I've reset my router god knows how many times. I used to be able to clock in a 25Mbps download speed but now I get 2Mbps and sometimes 0.3! I simply don't know why my internet connection has been so awful these past two weeks. If anyone has any pointers, they'd be greatly appreciated
